STATISTICAL TERMINOLOGY

The Basics, Misconceptions, and Predantics

Erik Kusch

erik.kusch@au.dk

Section for Ecoinformatics & Biodiversity
Center for Biodiversity and Dynamics in a Changing World (BIOCHANGE)
Aarhus University

??/??/2020

1. Biostatical Terms
   - Population vs. Sample
   - Test- vs. Training-Data
   - Supervised vs. Unsupervised Approaches
   - Randomness
2. Scales
   - Nominal + Binary
   - Ordinal
   - Interval
   - Relation/Ratio + Integer
3. Distributions
   - Normal Gaussian
   - Binomial
   - Poisson
4. Exercise
   - Online Resource

Population vs. Sample

Test- vs. Training-Data

Supervised vs. Unsupervised Approaches

Randomness

Nominal + Binary

Ordinal

Interval

Relation/Ratio + Integer

Normal Gaussian

Binomial

Poisson
